

Meet Fruit Lab Liqueurs!

Citry, Crism and Theia are warm, bright liqueurs that taste natural and add depth to cocktails without adding chemicals to our soil.

We created them to make organic cocktails easy. Easy to bring real flavor to the glass. Easy to update everyone's favorite cocktails. Easy to support the environment. We call the collection Fruit Lab—our factory's name.

Bring the garden to the glass

We hand blend whole, organic ingredients like oranges, flowers, teas, spices and cane sugar with organic spirits to capture bold, complex flavors and aromas. We take our time and make each liqueur in small batches for the best quality. This is the way we create honest flavor.

Citry — Combines the familiar aromas and flavors of fresh Valencia and naval oranges, with the haunting scent of Bergamot sour orange. Bright and complex, Citry works well in any cocktail requiring orange liqueur, including the margarita and cosmopolitan.

Crism — A powerful balance of the sweet-sour nature of hibiscus flowers. The combination of fiery red color, floral aromas and tangy berry flavors make Crism an ideal medium for modern, colorful martinis.

Theia — Like a night garden infused with flowering jasmine, Theia evokes a harmony of the exotic and the familiar. It's as comfortable in champagne cocktails as in martinis, or simply with soda and a squeeze of lime.

Planting fruit trees

1% of sales support The Fruit Tree Planting Foundation, which plants fruit trees for populations in need and to improve the surrounding air, soil, and water.
